Importance: High

We will redact contractor names, not EPA employee names.

On every page of the work plan, in tiny font, there is a statement from the contractor that the document is confidential and proprietary. I suggest that we **NOT** publish the work plan until we can get the contractor to withdraw this claim. R8 can work with the P.O. and/or C.O. tomorrow to try to resolve this claim.

I recommend that we publish the statement of work tonight (we will take off the routing slip on the last page) and wait to publish the other 3 (Work Plan, HASP, and Water Treatment plan) once we address the confidentiality claim on the work plan. Sound ok?

Still waiting for authorization from David Ostrander/ Melissa Harrison.

Don't individual worker names need to come off?

Importance: High

David and Melissa –

This is a request to authorize posting today of the GKM Work Plan, the Task Order SOW from 2014 under which the Workplan was created, the Health and Safety Plan, and related water treatment plan on the GKM public website. Following your authorization and prior to posting, these documents will be reviewed by Jennifer Colaizzi/ EOC Public Information and OGC. Please reply to all with your response as soon as possible.

Three of the documents are attached. Due to file size, I will send the Health and Safety Plan via separate email.

Thank you,

Suzanne

Subject: Work Plan and related documents

Suzanne – Here are 4 documents. There is the Work Plan, the Task Order SOW from 2014 under which the Workplan was created, the Health and Safety Plan, and a water treatment plan written specifically for the Red & Bonita work that is being conducted concurrently nearby but was deemed capable of being used for the Gold King work.

Because of the size of the documents, I will have to send you the HASP in a separate email.

There is at least one other document that is relevant but has not been scanned and placed in SDMS but should be available in the morning. This is the emergency plan.
